

Quantumwave

What are cold lasers?

Cold lasers are a class of low level lasers (LLL) which are often referred to as soft lasers, therapeutic lasers, healing lasers or low level laser therapy. They are low powered lasers which do not cut or burn the tissue; rather they work to gently donate energy or waves of photons to rejuvenate the cell.

How do soft lasers work?

Low level lasers are very popular because they donate energy to cells which stimulates the mitochondria or the part of the cell which makes energy which is called ATP. ATP or Adenosinetriphosphate is the energy molecule which governs 80 - 90% of the cells' activities.

Cold lasers or healing lasers work in much the same way that sunlight on a garden works. The sunlight donates energy in the form of photons which in turn stimulates plants and vegetables to grow faster and more efficiently. Low level lasers work in the same way of donating photons or energy which in turn regenerates tissue and cells.

Where can low level lasers be used?

Soft healing lasers are being used in all facets of health care from doctors and physicians to alternative health providers such as chiropractors, acupuncturists, naturopaths, osteopaths, massage therapists, Veterinarians and healers.

For years healing lasers were primarily used by health practitioners such as chiropractors and veterinarians because of the high cost of laser technology. Now with less expensive laser technology many lay people are also taking advantage of the amazing healing properties of laser therapy and are purchasing their own soft lasers. Scalar Wave Lasers have been designed for both the lay person and health provider.

Is the laser FDA approved?

The Scalar Wave Laser System is FDA registered for temporary relief of minor muscle and joint pain, arthritis and muscle spasm, relieving stiffness,

promoting relaxation of muscle tissue, and to temporarily increase local blood circulation.

NOW FDA CLEARED, Health Canada Cleared, Health Mexico Cleared, TGA Australia Cleared and CE Cleared for Europe & the UK!

With an **FDA Over The Counter (OTC) Clearance**, Scalar Wave Lasers are equally desirable by home users and seasoned practitioners alike. These esteemed clearances have paved the way for independent distributors such as myself to share this amazing technology with health minded people worldwide.

Effective January 6, 2011 the laser and all three probes have been given Health Canada Certification. The Quantumwave Laser is now approved as a Class 3 Medical Device in Canada

What are scalar waves?

Scalar waves are revolutionary neutral waves of energy. They do not have polarity and therefore do not travel in a linear fashion from past to present. They are unified field energy which is profoundly effective for neutralizing chronic pain, stress, dis-ease and cell memory of any kind.

All polarity is, in effect, a contraction of the unified field and what makes scalar waves so unique is that they are able to unwind and clear these contractions. This works in much the same way that an old cassette tape works. If you want to clear the information you simply change the polarity which neutralizes the information.

What makes your Scalar Wave Laser unique?

The Scalar Wave Laser is the first truly quantum laser rejuvenation system. The Scalar Wave Laser is revolutionary in its' ability to neutralize and clear cell memory. This unique feature is made possible by our patent pending scalar wave technology.

It is said that every 7-8 years we replace every cell of our body. Then why is it that so many people are not fully recovering from injuries and dis-ease 10, 20 and even 30 years later? Researchers have discovered something called cellular memory where cells pass on this tainted memory every time they divide and replicate. Since then the question has been how can we clear this cellular memory and give our cells and tissues a better chance at full recovery free from the tainted memories of the past?

Technology is Moving us in the Right Direction:

Thanks to the Scalar Wave Laser and the very unique Scalar Wave technology that is incorporated into it, we have made a step in the right direction. All low level lasers donate energy in order to rejuvenate the cell. What makes the Scalar Wave laser truly unique is the ability to clear the cell memory. *Cell memory is the stress or tension pattern underneath all injury and dis-ease.* Scalar Wave proprietary technology activates scalar waves, which **neutralize all polarity and shift the cell memory.**

A Quote from Paul Weisbart SWL Inventor:

"This quantum laser approach can be applied to any injuries, stress, tension, dis-ease, or to activate the key body systems such as the glands, organs, chakras, meridians or any of the cells which make up the body. The universe is filled with coherent neutral energy or space. When people become stressed and tense they hold onto cellular memory, which renders the body incoherent. When the body is incoherent it no longer taps into the vast reservoir of space and neutral energy.

Our approach to lasers is to unwind and clear this cellular memory so that the body can relax, unwind and open up to the abundant energy of the universe. When it does this, injuries, stress and dis-ease disappear. This energy, when it flows and is abundant, is vital and full of life."

Are Low Level Lasers Safe?

The answer is a resounding YES. When Low Level Lasers are used correctly, they are very safe. The most important safety regulation is to avoid pointing a laser at the eye.

Scalarwave Laser - Main Unit

The Scalarwave Laser is our main cold laser model. It has 16 5 mw laser diodes in 650 nm or red spectrum and in the 780 nm or infra red spectrum, and unique violet LED's with high powered narrow beam width to help soften the light. All of our lasers use revolutionary patented scalarwave technology, are portable and easy to use.

Optional Probes for use with the Scalar Wave Laser

780 nm Infrared 100mW – used for Pain, Musculoskeletal System, Hard Tissue, Bones, Teeth, Tendons, Ligaments, smoking cessation and weight control.

650 nm Red 100mW – used for Pain, Inflammation, Scar Reduction, Wounds, Burns, Skin Care, Wrinkles and Acne.

405nm Violet 100mW – used for Anti-Aging, Pain Relief, Acne, Wrinkles, Muscles and Nerves. The 405nm Violet carries more information than all other wavelengths and works at all depths. It is a top performer when it comes to destroying bacteria, fighting infections and supporting the healing of skin lesions.

The Quantum laser approach

Quantum laser can be applied to any injury, stress, tension, dis-ease, or to activate body systems such as glands, chakras, meridians or any of the cells which make up the body.

Optimize your health using a gentle, pain free, side effects free, non-invasive alternative health solution that supports psychological, spiritual and physical well being.

Quantum laser brings one to '**Still point**'. When life becomes pleasurable because the glands, instead of releasing adrenaline and cortisol, the glands start to release other compounds which are based in bliss, joy, love, peace and happiness.

The healing potential of scalar waves is phenomenal. Tom Bearden, a scalar wave pioneer expressed it like this,

"The medical implications are enormous. By just reversing the damaged cells back to a previous physical state, this gives physics mechanism for controlled cellular dedifferentiation, in biology terms. Physicians will time-reverse diseased, damaged or aged cells back to an earlier healthy condition, including all the cellular genetics. Normal cells are just reversed to a slightly younger condition."

Professional Testimonial:

"The laser treatment speeds up cell repair & stimulates the immune, lymphatic, & vascular systems." -- Paul Sibert, M.D.
Chief of Neurology at Jersey Shore University Medical Center

Cold Laser Research Literature and Information

Laser Technology Overview

In 1917, Albert Einstein established the physical principle of "Light Amplification by Stimulated Emission of Radiation," thus paving the way for the development of the laser. In June 1960, Theodoro H. Maiman constructed the world's first laser using a ruby crystal, now known as the ruby laser. In 1965, doctors Sinclair, Knoll and Mester pioneered the way for therapeutic lasers through their research with human tissue. These lasers do not cut or destroy tissue, but biostimulate the tissue creating a therapeutic curative effect.

Therapeutic lasers work by supplying energy to the body in the form of non-thermal photons of light. The body is able to absorb this external energy on a cellular level and transform light energy into chemical energy, which the body uses to accelerate the normal healing rate of tissue for a wide range of ailments.
